

COMBIVIS Studio HMI 4.0

Lesson 1

Installation and first steps

You will learn in this lesson...

Goals:

- Download and installation
- Request / Activation a license
- Language settings
- Use the update- and help-functions

Download and installation

Via USB-Dongle 00C6DA0-00xx

Or from the KEB-Webpage:

<https://www.keb.de>

- Products
- Automation
- Automationtools
- COMBIVIS studio HMI

Not licensed products can be used for a limited time as demo version.

Request / activation license

Help > License information

For activation the license it's necessary to register every workplace with its own MAC-address via Licence@KEB.de.

Copies the marked MAC-Address in the cache.

Opens your standard-mail program with a prepared Email.

After receiving the activation-files, it's necessary to open them once and restart COMBIVIS Studio HMI.

The registered customer name will be displayed in the upper program bar.

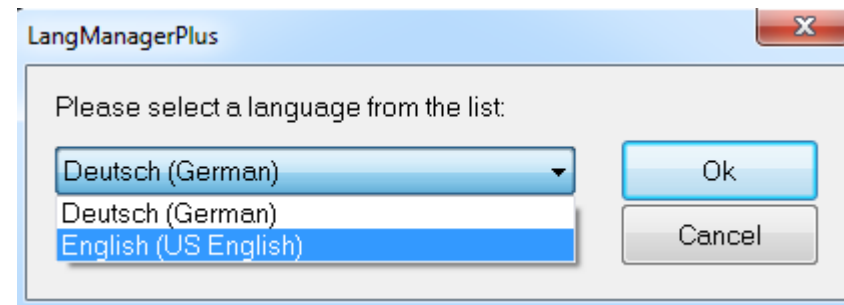

Language-settings

You can choose between two languages: German and English.

1. Start 
2. All Programs > KEB
3. COMBIVIS Studio HMI 4.0 > Tools
4. Language Manager
5. Restart COMBIVIS studio HMI 4.0

General information

Use the COMBIVIS help-functionality:

> Help

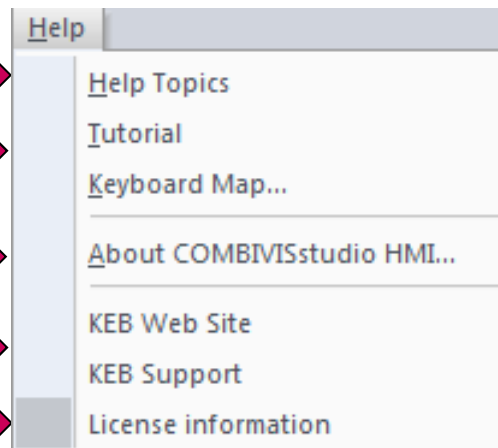

General Help- and search-function
